2.c. Pernyataan dan Interpretasi Standar Akuntansi Baru dan Revisi yang Berlaku Efektif 2.c. pada Tahun Berialan

Standar dan amendemen standar berikut efektif untuk periode yang dimulai pada atau setelah tanggal 1 Januari 2022, dengan penerapan dini diperkenankan yaitu:

- Amandemen PSAK 22: Kombinasi Bisnis tentang referensi ke Kerangka Konseptual;
- Amandemen PSAK 57: Provisi, Liabilitas Kontinjensi, dan Aset Kontinjensi tentang Kontrak Merugi - Biaya Memenuhi Kontrak;
- Amandemen PSAK 16: Aset Tetap tentang Hasil Sebelum Penggunaan yang Diintensikan:
- PSAK 71 (Penyesuaian Tahunan 2020): Instrumen Keuangan;
- PSAK 73 (Penyesuaian Tahunan 2020): Sewa;

Implementasi standar-standar tersebut tidak memiliki dampak yang signifikan terhadap jumlah yang dilaporkan di periode berjalan atau tahun sebelumnya.

2.d. Prinsip-prinsip Konsolidasian

Laporan keuangan konsolidasian mencakup laporan keuangan Perusahaan dan entitasentitas anak seperti disebutkan pada Catatan 1.c.

Entitas anak adalah entitas yang dikendalikan oleh Grup, yakni Grup terekspos, atau memiliki hak, atas imbal hasil variabel dari keterlibatannya dengan entitas dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kemampuan kini untuk mengarahkan aktivitas relevan dari entitas (kekuasaan atas investee).

Keberadaan dan dampak dari hak suara potensial dimana Grup memiliki kemampuan praktis untuk melaksanakan (yakni hak substantif) dipertimbangkan saat menilai apakah Grup mengendalikan entitas lain.

Laporan keuangan Grup mencakup hasil usaha arus kas, aset dan liabilitas dari Perusahaan dan seluruh entitas anak yang, secara langsung dan tidak langsung, dikendalikan oleh Perusahaan. Entitas anak dikonsolidasikan sejak tanggal efektif akuisisi, yaitu tanggal dimana Grup secara efektif memperoleh pengendalian atas bisnis yang diakuisisi, sampai tanggal pengendalian berakhir.

Entitas induk menyusun laporan keuangan konsolidasian dengan menggunakan kebijakan akuntasi yang sama untuk transaksi dan peristiwa lain dalam keadaan yang serupa. Seluruh transaksi, saldo, laba, beban, dan arus kas dalam intra kelompok usaha terkait dengan transaksi antar entitas dalam grup eliminasi secara penuh.

Grup mengatribusikan laba rugi dan setiap komponen dari penghasilan komprehensif lain kepada pemilik entitas induk dan kepentingan non-pengendali meskipun hal tersebut mengakibatkan kepentingan non-pengendali memiliki saldo defisit. Grup menyajikan kepentingan nonpengendali di ekuitas dalam laporan posisi keuangan konsolidasian, terpisah dari ekuitas pemilik entitas induk.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian adalah transaksi ekuitas (yaitu transaksi dengan pemilik dalam kapasitasnya sebagai pemilik). Ketika proporsi ekuitas yang dimiliki oleh kepentingan non-pengendali berubah, Grup menyesuaikan jumlah tercatat kepentiangan pengendali dan kepentingan non-pengendali untuk mencerminkan perubahan kepemilikan relatifnya dalam entitas anak. selisih antara jumlah dimana kepentingan nonpengendali disesuaikan dan nilai wajar dari jumlah yang diterima atau dibayarkan diakui langsung dalam ekuitas dan diatribusikan pada pemilik dari entitas induk.

Jika Grup kehilangan pengendalian, maka Grup:

- Menghentikan pengakuan aset (termasuk goodwill) dan liabilitas entitas anak pada jumlah tercatatnya ketika pengendalian hilang;
- Menghentikan pengakuan jumlah tercatat setiap kepentingan non-pengendali pada entitas anak terdahulu ketika pengendalian hilang (termasuk setiap komponen penghasilan komprehensif lain yang diatribusikan pada kepentingan non-pengendali);
- Mengakui nilai wajar pembayaran yang diterima (jika ada) dari transaksi, peristiwa, atau keadaan yang mengakibatkan hilangnya pengendalian;
- Mengakui sisa investasi pada entitas anak terdahulu pada niali wajarnya pada tanggal hilangnya pengendalian;
- Mereklasifikasikan ke laba rugi, atau mengalihkan secara langsung ke saldo laba jika disyaratkan oleh SAK lain, jumlah yang diakui dalam penghasilan komprehensif lain dalam kaitan dengan entitas anak
- Mengakui perbedaan ataupun yang dihasilkan sebagai keuntungan atau kerugian dalam laba rugi yang diatribusikan kepada entitas induk

2.e. Transaksi dan Saldo dalam Mata Uang Asing

Dalam menyiapkan laporan keuangan, setiap entitas di dalam grup mencatat dengan menggunakan mata uang dari lingkuangan ekonomi utama di mana entitas beroperasi ("mata uang fungsional"). Mata uang fungsional Perusahaan dan sebagian besar entitas anak adalah Rupiah.

Transaksi-transaksi selama tahun berjalan dalam mata uang asing dicatat dalam Rupiah dengan kurs spot antara Rupiah dan valuta asing pada tanggal transaksi. Pada akhir periode pelaporan, pos moneter dalam mata uang asing dijabarkan ke dalam Rupiah menggunakan kurs penutup, yaitu kurs tengah Bank Indonesia pada 31 Maret 2023 dan 31 Desember 2022,

The consolidated statements of cash flows are prepared using direct method and classified into operating, investing and financing activities.

The presentation currency used in the preparation of the consolidated financial statements is Indonesian Rupiah which is the functional currency of the Group.

New and Revised Statements and Intrepretation of Financial Accounting Standard Effective in The Current Year

Standards and amendments to standards effective for periods beginning on or after January 1, 2022, with early adoption is permitted are:

- Amendments PSAK 22: Business Combinations regarding Reference to Conceptual Frameworks; Amendments PSAK 57: Provisions, Contingent Liabilities, and Contingent Assets regarding Onerous Contracts - Cost of Fulfilling the Contracts;
- Amendments PSAK 16: Property, Plant and Equipment regarding Proceeds before Intended Use;
- PSAK 71 (Annual Improvement 2020): Financial Instruments;
- PSAK 73 (Annual Improvement 2020): Leases;

The implementation of above standards had no significant effect on the amount reported for current period or prior financial year.

Principles of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and subsidiaries as described in Notes 1.c.

A subsidiary is an entity controlled by the Group, ie the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its current ability to direct the entity's relevant activities (power over the investee).

The existance and effect of substantive potential voting rights that the Group has the practical ability to exercise (ie substantive rights) are considered when assessing whether the Group controls another entity.

The Group's fiannoial statements incorporate the results, cash flows, assets, and liabilities of the Company and all of its directly and indirectly controlled subsidiaries. Subsidiaries are consolidated from the effective date of acquisition, which is the date on which the Group effectively obtains control of the acquired business, until that control ceases.

A parent prepares consolidated financial statements using uniform accounting policies for like transactions and other events in similar circumtances. All intragroup transactions, balances, income, expenses and cash flows are eliminated in full on consolidation.

The group attributed the profit and loss and each component of other comprehensive income to the owners of the parent and non-controlling interest even though this results is the non-controlling interest having a deficit balance. The Group presents non-controlling interest in equity in the consolidated statement of financial position, separately from the equity owners of the parent.

Changes in the parent's ownership interest in subsidiary that do not result in loss of control are equity transactions (ie transactions with owners in their capacity as owners). When the proportion of equity held by non-controlling interest change, the Group adjusted the carrying amounts of the controlling interest and non-controlling interest to reflect the changes in their relative interest in the subsidiaries. Any difference between the amount by which the non-controlling interest are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the parent.

If the Group loses control, the Group:

- Derecognize the assets (including goodwill) and liabilities of te subsidiary at their carrying amounts at the date when control is lost;
- b. Derecognize the carrying amount of any non-controlling interest in the former subsidiary at the date when control is lost (including any components of other comprehensive income attributable to them):
- Recognize the fair value of the consideration received, if any, from the transaction, event or circumtances that resulted in the loss of control
- d. Recognize any investment retained in the former subsidiary at fair value at the date when control is lost
- Reclassify to profit or loss, or transfer directly to retained earnings if required by other SAKs, the amount recognized in other comprehensive income in relation to the subsidiary:
- Recognizes any resulting difference as a gain or loss attributable to the parent.

Transactions and Balances in Foreign Currencies

In preparing financial statements, each of the entities within the Group record by using the currency of the primary economic environtment in which the entity operates ("the functional currency"). The functional currency of the Company and most of the subsidiares are Rupiah.

Transaction during the year in foreign currencies are recorded in Rupiah by applying to the foreign currency amount the spot exchange rate between Rupiah and the foreign currency at the date of transactions. At the end of reporting period, foreign currency monetary items are translated to Rupiah using the closing rate, ie middle rate of Bank of Indonesia at March 31, 2023 and December 31, 2022, as follows:

Per 31 Maret 2023 (Tidak Diaudit) dan 31 Desember 2022 (Diaudit) Serta Untuk Periode Tiga Bulan yang Berakhir 31 Maret 2023 dan 2022 (Tidak Diaudit)

Seluruh transaksi dan saldo yang signifikan dengan pihak berelasi diungkapkan dalam Catatan yang relevan.

2.g. Instrumen Keuangan

Pengakuan dan Pengukuran Awal

Grup ini mengakui aset keuangan atau liabilitas keuangan dalam laporan posisi keuangan konsolidasian, jika dan hanya jika, Grup menjadi salah satu pihak dalam ketentuan pada kontrak instrumen tersebut. Pada saat pengakuan awal aset keuangan atau liabilitas keuangan, Grup mengukur pada nilai wajarnya. Dalam hal aset keuangan atau liabilitas keuangan tidak diukur pada nilai wajar melalui laba rugi, nilai wajar tersebut ditambah atau dikurang dengan biaya transaksi yang dapat diatribusikan secara langsung dengan perolehan atau penerbitan aset keuangan atau liabilitas keuangan tersebut. Biaya transaksi yang dikleuarkan sehubungan dengan perolehan aset keuangan dan penerbitan liabilitas keuangan yang diklasifikasikan pda nilai wajar melalui laba rugi dibebankan segera.

Pengukuran Selanjutnya Aset Keuangan

Aset keuangan Grup diklasifikasikan sebagai berikut: aset keuangan yang diukur pada biaya perolehan yang diamortisasi, aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain, aset keuangan yang diukur pada nilai wajar melalui laba rugi.

- (i) Aset Keuangan yang Diukur pada Biaya Perolehan Diamortisasi
 - Aset keuangan diukur pada biaya perolehan diamortisasi ketika kedua kondisi berikut terpenuhi:
 - Aset keuangan dikelola dalam model bisnis yang bertujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual saja; dan
 - Persyaratan kontraktual dari aset keuangan tersebut memberikan hak pada tanggal tertentu atas arus kas yang semata dari pembayaran pokok dan bunga (solely payments of principal and interest - SPPI) dari jumlah pokok terutang.

Aset keuangan ini diukur pada jumlah yang diakui pada awal pengakuan dikurangi dengan pembayaran pokok, kemudian dikurangi atau ditambah dengan jumlah amortisasi kumulatif atas perbedaan jumlah pengakuan awal dengan jumlah pada saat jatuh tempo, dan penurunan nilainya.

Pendapatan keuangan dihitung dengan menggunakan metode suku bunga efektif dan diakui di laba rugi. Perubahan pada nilai wajar diakui di laba rugi ketika aset dihentikan atau direklasifikasi.

Aset keuangan yang diklasifikasikan menjadi aset keuangan yang diukur pada biaya perolehan diamortisasi dapat dijual ketika terdapat peningkatan risiko kredit. Penghentian untuk alasan lain diperbolehkan namun jumlah penjualan tersebut harus tidak signifikan jumlahnya atau tidak sering.

.f. Related Parties Transactions and Balances

Related party represents a person or an entity who is related to the reporting entity:

- A person or a close member of that person's family is related to a reporting entity if that person:
 - has control or joint control over the reporting entity;
 - ii. has significant influence over the reporting entity; or
 - iii. is a member of the key management personnel of reporting entity or of a parent of the reporting entity
- An entity is related to the reporting entity if it meets one of the following:
 - The entity, and the reporting entity are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others.)
 - One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
 - iii. Both entities are joint ventures of the same third party.
 - iv. One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
 - v. The entity is a post-employment benefit plan for the benefit of employees of either the reporting entity, or an entity related to the reporting entity. If the reporting entity in itself such a plan, the sponsoring employers are also related to the reporting entity.
 - vi. The entity is controlled or jointly controlled by a person identified in (a).
 - vii A person idnetified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or a parent of the entity); or
 - viii The entity, or any member of a group of which it is a part, provides key management personnel services to the reporting entity or to the parent of the reporting entity.

All significant transactions and balances with realted parties are disclosed in the relevant Notes.

2.g. Financial Instruments

Initial Recognition and Measurement

The Grup recognize a financial assets or a financial liabilities in the consolidated statement of financial position when, and only when, it becomes a party o the contractual provisions of the instrument. At initial recognition, the Group measure all financial assets and financial liabilities at its fair value. In the case of a financial assets or financial liability not at fair value through profit or loss, fair value plus or minus with the transaction cost that are directly attributtable to the acquisition or issue of the financial asset or financial liability transaction costs incurred on acquisition of a financial asset and issue of a financial liability classified at fair value through profit or loss are expensed immediately.

Subsequent Measurement of Financial Assets

The Group's financial assets are classified into the following specified categories: financial assets at amortized costs, financial assets at fair value through other comprehensive income, and financial assets at fair value through profit or loss.

- (i) Financial Assets Measured at Amortized Costs
 - Financial assets are measured at amortized costs if these conditions are met:
 - The objective of business model to hold the financial assets is only to collect contractual cash flows; and
 - The contractual cash flows of the financial asset give rise to payments on specified dates that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

The financial asset is measured at the amount recognized at initial recognition minus principal prepayments, plus or minus the cumulative amortization of any difference between that initial amount and the maturity amount and any loss allowance.

Interest income is calculated using the effective interest method and is recognized in profit or loss. Changes in fair value are recognized in profit and loss when the asset is derecognized or reclassified.

Financial assets classified to amortized cost may be sold where there is an increase in credit risk. Disposals for other reasons are permitted but such sales should be insignificant in value or infrequent in nature.

Per 31 Maret 2023 (Tidak Diaudit) dan 31 Desember 2022 (Diaudit) Serta Untuk Periode Tiga Bulan yang Berakhir 31 Maret 2023 dan 2022 (Tidak Diaudit) (Dalam Rupiah Penuh)

(ii) Aset Keuangan yang Diukur pada Nilai Wajar Melalui Penghasilan Komprehensif Lain ("FVTOCI")

Aset keuangan diukur pada FVTOCI jika kedua kondisi berikut terpenuhi:

- Aset keuangan dikelola dalam model bisnis yang tujuannya akan terpenuhi dengan mendapatkan arus kas kontraktual dan menjual aset keuangan; dan
- Persyaratan kontraktual dari aset keuangan tersebut memberikan hak pada tanggal tertentu atas arus kas yang semata dari pembayaran pokok dan bunga (solely payments of principal and interest - SPPI) dari jumlah pokok terutang.

Aset keuangan tersebut diukur sebesar nilai wajar. Keuntungan atau kerugian diakui dalam penghasilan komprehensif lain, kecuali untuk kerugian akibat penurunan nilai dan keuntungan atau kerugian akibat perubahan kurs, diakui pada laba rugi. Ketika aset keuangan tersebut dihentikan pengakuannya atau direklasifikasi, keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain direklasifikasi dari ekuitas ke laba rugi sebagai penyesuaian reklasifikasi.

(iii) Aset Keuangan yang Diukur pada Nilai Wajar Melalui Laba Rugi ("FVTPL") Aset keuangan yang diukur pada FVTPL adalah aset keuangan yang tidak memenuhi kriteria untuk diukur pada biaya perolehan diamortisasi atau untuk diukur FVTOCI.

Setelah pengakuan awal, aset keuangan yang diukur pada FVTPL diukur pada nilai wajarnya. Keuntungan atau kerugian yang timbul dari perubahan nilai wajar aset keuangan diakui dalam laba rugi.

Aset keuangan berupa derivatif dan investasi pada instrumen ekuitas tidak memenuhi kriteria untuk diukur pada biaya perolehan diamortisasi atau kriteria untuk diukur pada FVTOCI, sehingga diukur pada FVTPL. Namun demikian, Grup dapat menetapkan pilihan yang tidak dapat dibatalkan saat pengakuan awal atas investasi pada instrumen ekuitas yang bukan untuk diperjualbelikan dalam waktu dekat (held for trading) untuk diukur pada FVTOCI. Penetapan ini menyebabkan semua keuntungan atau kerugian disajikan di penghasilan komprehensif lain, kecuali pendapatan dividen tetap diakui di laba rugi. Keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain direklasifikasi ke saldo laba tidak melalui laba rugi.

Pengukuran Selanjutnya Liabilitas Keuangan

Grup mengklasifikasikan seluruh liabilitas keuangan sehingga setelah pengakuan awal liabilitas keuangan diukur pada biaya perolehan diamortisasi, kecuali:

- Liabilitas keuangan pada nilai wajar melalui laba rugi. Liabilitas dimaksud, termasuk derivatif yang merupakan liabiliatas, selanjutnya akan diukur pada nilai wajar.
- Liabilitas keuangan yang timbul Ketika pengalihan aset keuangan yang tidak memenuhi kualifikasi penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan.
- Kontrak jaminan keuangan dan komitmen untuk menyediakan pinjaman dengan suku bunga dibawah pasar. Setelah pengakuan awal, penerbit kontrak dan penerbit komitment selanjutnya mengukur kontrak tersebut sebesar jumlah yang lebih tinggi antara:
 - Jumlah penyisihan kerugian dan
 - Jumlah yang pertama kali diakui dikurangi dengan, jika sesuai, jumlah kumulatif dari pendhasilan yang diakui sesuai dengan prinsip PSAK 72.

Imbalan kontijensi yang diakui oleh pihak pengakusisi dalam kombinasi bisnis Ketika PSAK 22 diterapkan. Imbalan kontijensi selanjutnya diukur pada nilai wajar dan selisihnya dalam laba rugi.

Saat pengakuan awal Grup dapat membuat penetapan yang takterbatalkan untuk mengukur liabilitas keuangan pada nilai wajar melalui laba rugi, jika diizinkan oleh standar atau jika penetapan akan menghasilkan informasi yang lebih relevan, karena:

- mengeliminasi atau mengurangi secara signifikan inkosistensi pengukuran atau pengakuan (kadang disebut sebagai "accounting mismatch") yang dapat timbul dari pengukuran aset atau liabilitas atau pengakuan keuntungan dan kerugian atas aset atau liabilitas dengan dasar yang berbeda beda; atau
- sekelompok liabilitas keuangan atau aset keuangan dan liabilitas keuangan dikelola dan kinerjanya dievaluasi berdasarkan nilai wajar, sesuai manajemen risiko atau strategi investasi yang terdokumentasi, dan informasi dengan dasar nilai wajar dimaksud atas kelompok tersebut disediakan secara internal untuk personil manajemen kunci Grup.

Penurunan Nilai Aset Keuangan

Grup mengakui kerugian kredit ekspektasian untuk aset keuangan yang diukur pada biaya perolehan diamortisasi, aset keuangan yang diukur pada FVTOCI, piutang sewa, aset kontrak atau komitmen pinjaman dan kontrak jaminan keuangan. Aset keuangan yang berupa investasi pada instrumen ekuitas tidak dilakukan penurunan nilai.

Pada setiap tanggal pelaporan, Grup mengukur penyisihan kerugian instrumen keuangan sejumlah kerugian kredit ekspektasian sepanjang umurnya jika risiko kredit atas instrumen keuangan tersebut telah meningkat secara signifikan sejak pengakuan awal. Namun, jika risiko kredit instrumen keuangan tersebut tidak meningkat secara signifikan sejak pengakuan awal, maka mengakui sejumlah kerugian kredit ekspektasian 12 bulan.

Grup menerapkan metode yang disederhanakan untuk mengukur kerugian kredit ekspektasian tersebut terhadap piutang usaha dan aset kontrak tanpa komponen pendanaan yang sionifikan.

Grup menganggap aset keuangan gagal bayar ketika pihak ketiga tidak mampu membayar kewajiban kreditnya kepada Grup secara penuh. Periode maksimum yang dipertimbangkan ketika memperkirakan kerugian kredit ekspektasian adalah periode maksimum kontrak dimana Grup terekspos terhadap risiko kredit.

PT ACE HARDWARE INDONESIA Tbk AND SUBSIDIARY NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of March 31, 2023 (Unaudited) and December 31, 2022 (Audited) And For the Three Month Periods Ended March 31, 2023 and 2022 (Unaudited) (In Full Rupiah)

(ii) Financial Assets Measured at Fair Value Through Other Comprehensive Income ("FVTOCI")

The financial assets are measured at FVTOCI if these conditions are met:

- The objective of business model to hold the financial assets is to collect contractual cash flows and to sell the assets; and
- The contractual cash flows of the financial asset give rise to payments on specified dates that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

The financial assets are measured at fair value. The changes in fair value are recognized initially in other comprehensive income (OCI), except for impairment gains and losses, and a portion of foreign exchange gains and losses, are recognized in profit or loss. When the asset is derecognized or reclassified, changes in fair value previously recognized in other comprehensive income and accumulated in equity are reclassified from equity to profit and loss as a reclassification adjustment.

(iii) Financial Assets at Fair Value Through Profit or Loss ("FVTPL")

Financial assets measured at FVTPL are those which do not meet both criteria for neither amortized costs nor FVTOCL

After initial recognition, FVTPL financial assets are measured at fair value. The changes in fair value are recognized in profit or loss.

Financial assets in form of derivatives and investment in equity instrument are not eligible to meet both criteria for amortized costs or fair value through other comprehensive income FVTOCI. Hence, these are measured at fair value through profit or loss FVTPL. Nonetheless, the Group may irrevocably designate an investment in an equity instrument which is not held for trading in any time soon as FVTOCI. This designation result in gains and losses to be presented in other comprehensive income, except for dividend income on a qualifying investment which is recognized in profit or loss. Cumulative gains or losses previously recognized in other comprehensive income are reclassified to retained earnings, not to profit or loss.

Subsequent Measurement of Financial Liabilities

The Group shall classify all financial liabilities as subsequently measured at amortised cost, except for:

- Financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.
- Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies.
- Financial guarantee contracts and commitments to provide a loan at a below market interest rate. After initial recognition, an issuer of such a contract and an issuer of such a commitment shall subsequently measure it at the higher of:
 - The amount of the loss allowance and
 - The amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of PSAK 72.

Contingent consideration recognised by an acquirer in a business combination to which PSAK 22 applies. Such contingent consideration shall subsequently be measured at fair value with changes recognised in profit or loss.

The Group may, at initial recognition, irrevocably designate a financial liability as measured at fair value through profit or loss when permitted by the standard or when doing so results in more relevant information, because either:

- it eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases; or
- a group of financial liabilities or financial assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the Grup's key management personnel.

Impairment of Financial Assets

The Group recognize expected credit loss for its financial assets measured at amortized costs and financial assets measured at FVTOCI, lease receivables, contract assets or loan commitments and financial guarantee contracts. Financial asset in form of investment in equity instrument is not impaired.

At the end of each reporting date, the Group calculates any impairment provision in financial instruments based on its lifetime expected credit loss if the credit risk of the financial instruments has increased significantly since its initial recognition. However, if credit risk has not increased significantly since initial recognition, then 12 months expected credit loss is recognized.

The Group applied a simplified approach to measure such expected credit loss for trade receivables and contract assets without significant financing component.

The Group considers a financial asset to be in default when the counterparty is unlikely to pay its credit obligations to the Group in full. The maximum period considered when estimating expected credit loss is the maximum contractual period over which the Group is exposed to credit risk.

Per 31 Maret 2023 (Tidak Diaudit) dan 31 Desember 2022 (Diaudit) Serta Untuk Periode Tiga Bulan yang Berakhir 31 Maret 2023 dan 2022 (Tidak Diaudit) (Dalam Rupiah Penuh)

Penyisihan kerugian diakui sebagai pengurang jumlah tercatat aset keuangan kecuali untuk aset keuangan yang diukur pada FVTOCI yang penyisihan kerugiannya diakui dalam penghasilan komprehensif lain. Sedangkan jumlah kerugian kredit ekspektasian (atau pemulihan kerugian kredit) diakui dalam laba rugi, sebagai keuntungan atau kerugian penurunan nilai.

Pengukuran kerugian kredit ekspektasian dari instrumen keuangan dilakukan dengan suatu cara yang mencerminkan:

- Jumlah yang tidak bias dan rata-rata probabilitas tertimbang yang ditentukan dengan mengevaluasi serangkaian kemungkinan yang dapat terjadi;
- Nilai waktu uang; dan
- Informasi yang wajar dan terdukung yang tersedia tanpa biaya atau upaya berlebihan pada tanggal pelaporan mengenai peristiwa masa lalu, kondisi kini, dan perkiraan kondisi ekonomi masa depan.

Aset keuangan dapat dianggap tidak mengalami peningkatan risiko kredit secara signifikan sejak pengakuan awal jika aset keuangan memiliki risiko kredit yang rendah pada tanggal pelaporan. Risiko kredit pada instrumen keuangan dianggap rendah ketika aset keuangan tersebut memiliki risiko gagal bayar yang rendah, peminjam memiliki kapasitas yang kuat untuk memenuhi kewajiban arus kas kontraktualnya dalam jangka waktu dekat dan memburuknya kondisi ekonomik dan bisnis dalam jangka waktu panjang mungkin, namun tidak selalu, menurunkan kemampuan peminjam untuk memenuhi kewajiban arus kas kontraktualnya. Untuk menentukan apakah aset keuangan memiliki risiko kredit rendah, Grup dapat menggunakan peringkat risiko kredit internal atau penilaian eksternal. Misal, aset keuangan dengan peringkat "investment grade" berdasarkan penilakan eksternal merupakan instrumen yang memiliki risiko kredit yang rendah, sehingga tidak mengalami peningkatan risiko kredit secara signifikan sejak pengakuan awal.

Penghentian Pengakuan Aset dan Liabilitas Keuangan

Grup menghentikan pengakuan aset keuangan jika dan hanya jika hak kontraktual atas arus kas yang berasal dari aset berakhir, atau Grup mentransfer aset keuangan dan secara substansial mentransfer seluruh risiko dan manfaat atas kepemilikan aset kepada entitas lain. Jika Grup tidak mentransfer serta tidak memiliki secara substansial atas seluruh risiko dan manfaat kepemilikan serta masih mengendalikan aset yang ditransfer, maka Grup mengakui keterilibatan berkelanjutan atas aset yang ditransfer dan liabilitas terkait sebesar jumlah yang mungkin harus dibayar. Jika Grup memiliki secara substansial seluruh risiko dan manfaat kepemilikan aset keuangan yang ditransfer, Grup masih mengakui aset keuangan dan juga mengakui pinjaman yang dijamin sebesar pinjaman yang diferima.

Saat penghentian pengakuan aset keuangan secara keseluruhan, selisih antara jumlah tercatat aset dan jumlah pembayaran dan piutang yang diterima dan keuntungan atau kerugian kumulatif yang telah diakui dalam penghasilan komprehensif lain dan terakumulasi dalam ekuitas direklasifikasi ke laba rugi.

Saat penghentian pengakuan aset keuangan terhadap satu bagian saja (misalnya ketika Grup masih memiliki hak untuk membeli kembali bagian aset yang ditransfer), Grup engalokasikan jumlah tercatat sebelumnya dari aset keuangan tersebut pada bagian yang tetap diakui berdasarkan keterlibatan berkelanjutan dan bagian yang tidak lagi diakui berdasarkan nilai wajar relatif dari kedua bagian tersebut pada tanggal transfer. Selisih antara jumlah tercatat yang dialokasikan pada bagian yang tidak lagi diakui dan jumlah dari pembayaran yang diterima untuk bagian yang tidak lagi diakui dan setiap keuntungan atau kerugian kumulatif yang dialokasikan pada bagian yang tidak lagi diakui tersebut yang sebelumnya telah diakui dalam penghasilan komprehensif lain diakui pada laba rugi. Keuntungan dan kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain diakui pada laba rugi. Keuntungan dan kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain diakui sajar relatif kedua bagian tersebut.

Grup menghentikan pengakuan liabilitas keuangan, jika dan hanya jika, liabilitas Grup telah dilepaskan, dibatalkan atau kadaluarsa. Selisih antara jumlah tercatat liabilitas keuangan yang dihentikan pengakuannya dan imbalan yang dibayarkan dan utang diakui dalam laba rugi.

Metode Suku Bunga Efektif

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset atau liabilitas keuangan (atau kelompok aset atau liabilitas keuangan) dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas masa depan selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh jumlah tercatat neto dari aset keuangan atau liabilitas keuangan. Pada saat menghitung suku bunga efektif, Grup mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, seperti pelunasan dipercepat, opsi beli dan opsi serupa lain, tetapi tidak mempertimbangkan kerugian kredit masa depan.

Perhitungan ini mencakup seluruh komisi dan bentuk lain yang dibayarkan atau diterima oleh pihak-pihak dalam kontrak yang merupakan bagian takterpisahkan dari suku bunga efektif, biaya transaksi, dan seluruh premium atau diskonto lain.

Reklasifikas

Grup mereklasifikasi aset keuangan ketika Grup mengubah tujuan model bisnis untuk pengelolaan aset keuangan sehingga penilaian sebelumnya menjadi tidak dapat diterapkan.

Ketika Grup mereklasifikasi aset keuangan, maka Grup menerapkan reklasifikasi secara prospektif dari tanggal reklasifikasi. Grup tidak menyajikan kembali keuntungan, kerugian (termasuk keuntungan atau kerugian penurunan nilai), atau bunga yang diakui sebelumnya.

PT ACE HARDWARE INDONESIA Tbk AND SUBSIDIARY NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of March 31, 2023 (Unaudited) and December 31, 2022 (Audited) And For the Three Month Periods Ended March 31, 2023 and 2022 (Unaudited) (In Full Rupiah)

Impairment losses are recognized as a deduction in financial assets' carrying amount, except for financial assets measured at FVTOCI where its impairment is recognized in other comprehensive income. The expected credit loss (or recovery of credit loss) is recognized in profit or loss, as gains or losses of financial asset impairment.

The expected credit loss of financial intruments are conducted by a means which reflect:

- An unbiased and probability-weighted amount that reflects a range of possible outcomes:
- Time value of money; and
- Reasonable and supportable information that is available without undue cost or effort about past events, current conditions and forecasts of future conditions.

Financial assets may be considered to not having significant increase in credit risk since initial recognition if the financial assets have a low credit risk at the reporting date. Credit risk on financial instrument may be considered be low if there is a low risk of default, the borrower has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. To determine whether a financial asset has a low credit risk, the Group may use internal credit risk rating or external assessment. For example, a financial asset with 'investment grade' according to external assessment has a low credit risk rating, thus it does not experience an increase in significant credit risk since initial recognition.

Derecognition of Financial Assets and Liabilities

The Group derecognize a financial asset only when the contractual rights to the cash flows from the asset expire, or when they transfer the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers or retains substantially all the risks and rewards of ownership and continue to control the transferred asset, the Group recognize its retained interest in the asset and an associated liability for amounts they may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognize a collateralized borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the assets carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is reclassified to profit or loss.

On derecognition of a financial asset other than in its entirety (e.g., when the Group retains an option to purchase part of a transferred asset), the Group allocates the previous carrying amount of the financial asset between the part they continue to recognize under continuing involvement and the part they no longer recognize on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognized and the sum of the consideration received for the part no longer recognized and any cumulative gain or loss allocated to it that had been recognized in other comprehensive income is recognized in profit or loss. A cumulative gain or loss that had been recognized in other comprehensive income is allocated between the part that continues to be recognized and the part that is no longer recognized on the basis of the relative fair values of those parts.

The Group derecognize financial liabilities, if and only if the Group's obligations are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognized and the considerations paid and payable is recognized in profit or loss.

The Effective Interest Method

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discount estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimate cash flows considering all contractual terms of the financial instrument, for example, prepayment, call and similar option, but shall not consider future credit losses.

The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Reclassification

The Group reclassifies a financial asset if and only if the Group's business model objective for its financial assets changes so its previous model assessment would no longer apply.

If the Group reclassifies a financial asset, it is required the Group to apply the reclassification prospectively from the reclassification date. The Group does not restate previously recognized gains, losses (including impairment gains or losses) or interest.

Per 31 Maret 2023 (Tidak Diaudit) dan 31 Desember 2022 (Diaudit) Serta Untuk Periode Tiga Bulan yang Berakhir

31 Maret 2023 dan 2022 (Tidak Diaudit)

(Dalam Rupiah Penuh)

Ketika Grup mereklasifikasi aset keuangan keluar dari kategori pengukuran biaya perolehan diamortisasi menjadi kategori FVTPL, nilai wajarnya diukur pada tanggal reklasifikasi. Keuntungan atau kerugian yang timbul dari selisih antara biaya perolehan diamortisasi sebelumnya dan nilai wajar aset keuangan diakui dalam laba rugi.

Pada saat Grup melakukan reklasifikasi sebaliknya, yaitu dari aset keuangan kategori FVTPL menjadi kategori pengukuran biaya perolehan diamortisasi, maka nilai wajar pada tanggal reklasifikasi menjadi jumlah tercatat bruto yang baru.

Pada saat Grup mereklasifikasi aset keuangan keluar dari kategori pengukuran biaya perolehan diamortisasi menjadi kategori FVTOCI, nilai wajarnya diukur pada tanggal reklasifikasi. Keuntungan atau kerugian yang timbul dari selisih antara biaya perolehan diamortisasi sebelumnya dan nilai wajar aset keuangan diakui dalam penghasilan komprehensif lain.

Suku bunga efektif dan pengukuran kerugian kredit ekspektasian tidak disesuaikan sebagai akibat dari reklasifikasi. Ketika Grup mereklasifikasi aset keuangan sebaliknya, yaitu keluar dari kategori FVTOCI menjadi kategori pengukuran biaya perolehan diamortisasi, aset keuangan direklasifikasi pada nilai wajarnya pada tanggal reklasifikasi. Akan tetapi keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain dihapus dari ekuitas dan disesuaikan terhadap nilai wajar aset keuangan pada tanggal reklasifikasi. Akibatnya, pada tanggal reklasifikasi aset keuangan diukur seperti halnya jika aset keuangan tersebut selalu diukur pada biaya perolehan diamortisasi.

Penyesuaian ini memengaruhi penghasilan komprehensif lain tetapi tidak memengaruhi laba rugi, dan karenanya bukan merupakan penyesuaian reklasifikasi. Suku bunga efektif dan pengukuran kerugian kredit ekspektasian tidak disesuaikan sebagai akibat dari reklasifikasi.

Pada saat Grup mereklasifikasi aset keuangan keluar dari kategori pengukuran FVTPL menjadi kategori pengukuran FVTOCI, aset keuangan tetap diukur pada nilai wajarnya. Sama halnya, ketika Grup mereklasifikasi aset keuangan keluar dari kategori FVTOCI menjadi kategori pengukuran FVTPL, aset keuangan tetap diukur pada nilai wajarnya. Keuntungan atau kerugian kumulatif yang sebelumnya diakui di penghasilan komprehensif lain direklasifikasi dari ekuitas ke laba rugi sebagai penyesuaian reklasifikasi pada tanggal reklasifikasi

Saling Hapus Aset Keuangan dan Liabilitas Keuangan

Aset keuangan dan liabilitas keuangan disalinghapuskan, jika dan hanya jika, Grup saat ini memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut; dan berintensi untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

Pengukuran Nilai Wajar

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Nilai wajar aset dan liabillitas keuangan diestimasi untuk keperluan pengakuan dan pengukuran atau untuk keperluan pengungkapan.

Nilai wajar dikategorikan dalam level yang berbeda dalam suatu hirarki nilai wajar berdasarkan pada apakah input suatu pengukuran dapat diobservasi dan signifikansi input terhadap keseluruhan pengukuran nilai wajar:

- Harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik
- yang dapat diakses pada tanggal pengukuran (Level 1) Input selain harga kuotasian yang termasuk dalam Level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung maupun tidak langsung (Level 2)
- Input yang tidak dapat diobservasi untuk aset atau liabilitas (Level 3)

Dalam mengukur nilai wajar aset atau liabilitas, Grup sebisa mungkin menggunakan data pasar yang dapat diobservasi. Apabila nilai wajar aset atau liabilitas tidak dapat diobservasi secara langsung, Grup menggunakan teknik penilaian yang sesuai dengan keadaannya dan memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

Perpindahan antara level hirarki wajar diakui oleh Grup pada akhir periode pelaporan dimana perpindahan terjadi.

Kas dan Setara Kas

Kas dan setara kas termasuk kas, kas di bank (rekening giro), dan deposito jangka pendek dengan jangka waktu jatuh tempo 3 (tiga) bulan atau kurang sejak tanggal penempatannya dan tidak digunakan sebagai jaminan dan tidak dibatasi penggunaannya.

Persediaan

Persediaan dinyatakan berdasarkan jumlah terendah antara biaya perolehan dan nilai realisasi neto. Biaya persediaan terdiri dari seluruh biaya pembelian, biaya konversi, dan biaya lain yang timbul sampai persediaan berada dalam kondisi dan lokasi saat ini. Biaya perolehan ditentukan dengan metode rata-rata tertimbang. Nilai realisasi neto merupakan taksiran harga jual dalam kegiatan usaha biasa dikurangi estimasi biaya penyelesaian dan estimasi biaya yang diperlukan untuk membuat penjualan.

Setiap penurunan nilai persediaan di bawah biaya perolehan menjadi nilai realisasi neto dan seluruh kerugian persediaan diakui sebagai beban pada periode terjadinya penurunan atau kerugian tersebut. Setiap pemulihan kembali penurunan nilai persediaan karena peningkatan kembali nilai realisasi neto, diakui sebagai pengurangan terhadap jumlah beban persediaan pada periode terjadinya pemulihan tersebut.

PT ACE HARDWARE INDONESIA Thk AND SUBSIDIARY NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of March 31, 2023 (Unaudited) and December 31, 2022 (Audited) And For the Three Month Periods Ended March 31, 2023 and 2022 (Unaudited) (In Full Rupiah)

When the Group reclassifies its financial asset out of the amortized cost into FVTPL, then its fair value is measured at reclassification date. Any gains or losses resulted from the difference between previous amortized cost and its fair value is recognized in profit or loss.

Otherwise, if the Group reclassifies its financial asset from FVTPL into amortized cost, then its fair value at the date of reclassification becomes new gross carrying amount

When the Group reclassifies its financial asset out of the amortized cost into FVTOCI, its fair value is measured at the reclassification date. Any gains or losses resulted from the difference between previous amortized cost and fair value is recognized in other comprehensive income.

Effective interest rate and expected credit loss measurement are not adjusted as a result of the reclassification. Otherwise, when the Group reclassifies its financial asset out of the fair value through other comprehensive income into amortized cost, the financial asset is reclassified by its fair value at the reclassification date. However, any cumulative gains or losses previously recognized in other comprehensive income are omitted from equity and adjusted to the financial asset's fair value at the date of reclassification. Consequently, at the reclassification date, the financial asset is measured the same way as if it were amortized cost.

This adjustment affects other comprehensive income but not profit or loss, and hence it is not a reclassification adjustment. Effective interest rate and expected credit loss are no longer adjusted as a result of the reclassification.

When the Group reclassifies its financial asset out of the FVTPL into FVTOCI, the financial asset is measured at its fair value. Similarly, when the Group reclassifies its financial asset out of the FVTOCI into FVTPL, the financial asset is measured at its fair value. Any gains or losses previously recognized in other comprehensive income are reclassified out of the equity to profit or loss as a reclassification adjustment at the date of reclassification.

Offsetting a Financial Asset and a Financial Liability

A financial asset and financial liability shall be offset when and only when, the Group currently has a legally enforceable right to set off the recognized amount; and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

Fair values are categorised into different levels in a fair value hierarchy based on the degree to which the inputs to the measurement are observable and the significance of the inputs to the fair value measurement in its entirety:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date (Level 1)
- Inputs other than quoted prices included in Level 1 that are observable for the assets or liabilities, either b. directly or indirectly (Level 2)
- Unobservable inputs for the assets or liabilities (Level 3)

When measuring the fair value of an asset or a liability, the Group uses market observable data to the extent possible. If the fair value of an asset or a liability is not directly observable, the Group uses valuation techniques that appropriate in the circumstances and maximizes the use of relevant observable inputs and minimizes the use

Transfers between levels of the fair value hierarchy are recognised by the Group at the end of the reporting period during which the change occurred.

Cash and Cash Equivalents

Cash and cash equivalents are cash on hand, cash in banks (demand deposits) and time deposits with maturity periods of three months or less at the time of placement that are not used as collateral or are not restricted.

Inventories

Inventories are carried at the lower of cost and net realizable value. The cost of inventories comprise all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost is determined using the weighted average method. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale

The amount of any write-down of inventories to net realisable value and all losses of inventories shall be recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

2.j. Investasi pada Entitas Asosiasi

Entitas asosiasi adalah entitas dimana Grup memiliki kekuasaan untuk berpartisipasi dalam keputusan kebijakan keuangan dan operasional investee, tetapi tidak mengendalikan atau mengendalikan bersama atas kebijakan tersebut (pengaruh signifikan).

Investasi pada entitas asosiasi dicatat dengan menggunakan metode ekuitas. Dalam metode ekuitas, pengakuan awal investasi diakui sebesar biaya perolehan, dan jumlah tercatat ditambah atau dikurang untuk mengakui bagian atas laba rugi investee setelah tanggal perolehan. Bagian atas laba rugi investee diakui dalam laba rugi. Penerimaan distribusi dari investee mengurangi nilai tercatat investasi. Penyesuaian terhadap jumlah tercatat tersebut juga mungkin dibutuhkan untuk perubahan dalam proporsi bagian investor atas investee yang timbul dari penghasilan komprehensif lain, termasuk perubahan yang timbul dari revaluasi aset tetap dan selisih penjabaran valuta asing. Bagian investor atas perubahan tersebut diakui dalam penghasilan komprehensif lain.

Grup menghentikan penggunaan metode ekuitas sejak tanggal ketika investasinya berhenti meniadi investasi pada entitas asosiasi sebagai berikut:

- jika investasi menjadi entitas anak.
- jika sisa kepentingan dalam entitas asosiasi merupakan aset keuangan, maka Grup mengukur sisa kepentingan tersebut pada nilai wajar.
- ketika Grup menghentikan penggunaan metode ekuitas, Grup mencatat seluruh jumlah yang sebelumnya telah diakui dalam penghasilan komprehensif lain yang terkait dengan investasi tersebut menggunakan dasar perlakuan yang sama dengan yang disyaratkan jika investee telah melepaskan secara langsung aset dan liabilitas terkait.

2.k. Biaya Dibayar di Muka

Biaya dibayar di muka diamortisasi selama masa manfaatnya dengan menggunakan metode garis lurus.

Properti investasi adalah properti (tanah atau bangunan atau bagian dari suatu bangunan atau kedua-duanya) yang dikuasai oleh pemilik atau penyewa melalui sewa pembiayaan untuk menghasilkan sewa atau untuk kenaikan nilai atau kedua-duanya, dan tidak untuk digunakan dalam produksi atau penyediaan barang atau jasa atau untuk tujuan administratif; atau dijual dalam kegiatan usaha sehari-hari.

Properti investasi diakui sebagai aset jika dan hanya jika besar kemungkinan manfaat ekonomis masa depan yang terkait dengan properti investasi akan mengalir ke entitas; dan biaya perolehan properti investasi dapat diukur dengan andal.

Properti investasi pada awalnya diukur sebesar biaya perolehan, meliputi harga pembelian dan setiap pengeluaran yang dapat diatribusikan secara langsung (biaya jasa hukum, pajak pengalihan properti, dan biaya transaksi lain). Biaya transaksi termasuk dalam pengukuran

Setelah pengakuan awal, Grup memilih menggunakan modal biaya dan mengukur properti investasi sebesar biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai aset. Hak atas tanah tidak disusutkan dan disajikan sebesar biaya perolehan. Bangunan disusutkan dengan metode garis lurus berdasarkan taksiran masa manfaat ekonomis (20 tahun).

Biaya pemeliharaan dan perbaikan dibebankan pada laba rugi pada saat terjadinya, sedangkan pemugaran dan penambahan dikapitalisasi.

Grup mengalihkan properti ke, atau dari, properti investasi jika, dan hanya jika, ketika properti memenuhi, atau berhenti memenuhi, definisi properti investasi dan terdapat bukti atas perubahan penggunaan, mencakup:

- Dimulainya penggunaan oleh pemilik, atau pengembangan untuk pemilik, untuk pengalihan dari properti investasi menjadi properti yang digunakan sendiri;
- Dimulainya pengembangan untuk dijual, untuk pengalihan dari properti investasi menjadi persediaan:
- Berakhirnya pemakaian oleh pemilik, untuk pengalihan dari properti yang digunakan sendiri menjadi properti investasi; dan
- Insepsi sewa operasi kepada pihak lain, untuk pengalihan dari persediaan menjadi properti investasi.

Properti investasi dihentikan pengakuannya pada saat dilepaskan atau ketika tidak digunakan lagi secara permanen dan tidak memiliki manfaat ekonomi masa depan yang diperkirakan dari pelepasannya. Keuntungan atau kerugianyang timbul dari penghentian atau pelepasan dan jumlah tercatat aset, dan diakui dalam laba rugi pada periode terjadinya penghentian atau pelepasan.

Penyusutan properti investasi dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung dengan menggunakan metode garis lurus berdasarkan estimasi masa manfaat ekonomis aset sebagai berikut :

Tahun/ Years Bangunan

2.m. Aset Tetap

Aset tetap pada awalnya diakui sebesar biaya perolehan yang meliputi harga perolehannya dan setiap biaya yang dapat diatribusikan langsung untuk membawa aset ke kondisi dan lokasi yang diinginkan agar aset siap digunakan sesuai intensi manajemen.

Apabila relevan, biaya perolehan juga dapat mencakup estimasi awal biaya pembongkaran dan pemindahan aset tetap dan restorasi lokasi aset tetap, kewajiban tersebut timbul ketika aset tetap diperoleh atau sebagai konsekuensi penggunaan aset tetap selama periode tertentu untuk tujuan selain untuk memproduksi persediaan selama periode tersebut.

Investment in Associates

Associates are entities which the Group has the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies (significant influence).

Investment in associates accounted for using the equity method. Under the equity method, the investment in an associate is initially recognised at cost and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The investor's share of the profit or loss of the investee is recognised in profit or loss. Distributions received from an investee reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the investor's proportionate interest in the investee arising from changes in the investee's other comprehensive income, including those arising from the revaluation of property, plant and equipment and from foreign exchange translation differences. The investor's share of those changes is recognized in other comprehensive income.

The Group discontinue the use of the equity method from the date when its investment ceases to be an associate as follows:

- if the investment becomes a subsidiary.
- If the retained interest in the former associate is a financial asset, the Group measure the retained b. interest at fair value
- When the Group discontinue the use of the equity method, the Group account for all amounts previously C. recognized in other comprehensive income in relation to that investment on the same basis as would have been required if the investee had directly disposed of the related assets or liabilities.

Prepaid Expenses 2.k.

Prepaid expenses are amortized over their beneficial periods by using the straight-line method.

Investment properties are properties (land or a building or part of a building or both) held by the owner or the lessee under a finance lease to earn rentals or for capital appreciation or supply of goods or services or for administrative putposes; or sale in the daily business activities.

Investment property is recognised as an asset when, and when it is probable that the future economic benefits that are associated with the investment property will flow to the entiry; and the cost of the investment property can be measured reliably.

An investment property shall be measured initially at its cost, comprises its purchase price and any directly attributable expenditure (professional fees for legal services, property transfer taxes and other transaction costs). Transaction costs are included in the initial measurement.

After initial recognition, the Group choose to use cost model and measure its investment property at acquisition cost less accumulated depreciation and accumulated impairment losses. Landrights are not depreciated and are carried at costs. Buildings are depreciated using the straight-line method over their estimated useful lives (20 years).

Maintenance and repairment costs are charged to profit or loss as incurred, while renewals and betterments are capitalized.

The Group shall transfer a property, to, or from investment property when, and only when, there the property meets, or ceases to meet, the definition of investment property and there is evidence of the change in use, include:

- Commencement of owner-occupation, or of development with a view to owner-occupation, for a transfer from investment property to owner-occupied property;
- Commencement of development with a view to sale, for a transfer from investment property to inventories:
- End of owner-occupation, for a transfer from owner-occupied property to investment property; and C.
- Inception of an operating lease to another party, for a transfer from inventories to investment property.

An investment property is derecognizes on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. Gains or losses arising from the retirement or disposal are determined as the difference between the net disposal proceeds and the carrying amount of the assets, and are recognized in profit or loss in the period of the retirement or disposal.

Depreciation of investment properties starts when its available for use and its computed by using straight-line method based on the estimated useful lives of assets as follows:

Tarif Penyusutan/Depreciation Rate

Fixed Assets

d.

Fixed assets are initially recognized at cost, which comprises its purchase price and any cost directly attributable in bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended

Building

When applicable, the cost may also comprises the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

(Dalam Rupiah Penuh)

Setelah pengakuan awal, aset tetap kecuali tanah dinyatakan sebesar biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai.

Penyusutan aset tetap dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya dan dihitung dengan menggunakan metode garis lurus berdasarkan estimasi masa manfaat ekonomis aset sebagai berikut :

	Tahun/ Years
Bangunan	20
Prasarana dan Renovasi Bangunan	3-5
Peralatan Toko dan Kantor	4-8
Kendaraan	4-8

Aset tetap yang dikonstruksi sendiri disajikan sebagai bagian aset tetap sebagai "Aset dalam Konstruksi" dan dinyatakan sebesar biaya perolehannya. Semua biaya, termasuk biaya pinjaman, yang terjadi sehubungan dengan konstruksi aset tersebut dikapitalisasi sebagai bagian dari biaya perolehan aset tetap dalam konstruksi. Biaya perolehan aset tetap dalam konstruksi tidak termasuk setiap laba internal, jumlah tidak normal dari biaya pemborosan yang terjadi dalam pemakaian bahan baku, tenaga kerja atau sumber daya lain.

Akumulasi biaya perolehan yang akan dipindahkan ke masing-masing pos aset tetap yang sesuai pada saat aset tersebut selesai dikerjakan atau siap digunakan dan disusutkan sejak beroperasi.

Nilai tercatat dari suatu aset tetap dihentikan pengakuannya pada saat pelepasan atau ketika tidak terdapat lagi manfaat ekonomik masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian pengakuan tersebut (yang ditentukan sebesar selisih antara jumlah hasil pelepasan neto, jika ada, dan jumlah tercatatnya) dimasukkan dalam laba rugi pada saat penghentian pengakuan tersebut dilakukan.

Pada akhir periode pelaporan, Perusahaan melakukan penelaahan berkala atas masa manfaat, nilai residu, metode penyusutan, dan sisa umur pemakaian berdasarkan kondisi

2.n. Aset Takberwujud

Aset takberwujud diukur sebesar nilai perolehan pada pegakuan awal. Setelah pengakuan awal, aset takberwujud dicatat pada biaya perolehan dikurangi akumulasi amortisasi dan akumulasi rugi penurunan nilai

Umur manfaat aset takberwujud dinilai apakah terbatas atau tidak terbatas.

Aset takberwujud dengan umur manfaat terbatas

Aset takberwujud dengan umur manfaat terbatas diamortisasi selama umur manfaat ekonomi dengan metode garis lurus.

Amortisasi dihitung sebagai penghapusan biaya perolehan aset, dikurangi nilai residunya, atas umur ekonomisnya sebagai berikut :

Perangkat Lunak Komputer: 25% garis lurus

Periode amortisasi dan metode amortisasi untuk aset takberwujud dengan umur manfaat terbatas ditelaah setidaknya setiap akhir tahun buku.

Aset takberwujud dengan umur manfaat tidak terbatas

Aset takberwujud dengan umur manfaat tidak terbatas tidak diamortisasi. Masa manfaat aset takberwujud dengan umur tak terbatas ditelaah setiap tahun untuk menentukan apakah peristiwa dan keadaan dapat terus mendukung penilaian bahwa umur manfaat tetap tidak terbatas. Jika tidak, perubahan masa manfaat dari tidak terbatas menjadi terbatas diterapkan secara prospektif.

Aset takberwujud dengan umur tidak terbatas diuji untuk penurunan nilai setiap tahun dan kapanpun terdapat suatu indikasi bahwa aset takberwujud mungkin mengalami penurunan

Pada setiap akhir periode pelaporan, Grup menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, Grup mengestimasi jumlah terpulihkan aset tersebut. Jumlah terpulihkan ditentukan atas suatu aset individual, dan jika tidak memungkinkan, Grup menentukan jumlah terpulihkan dari unit penghasil kas dari aset tersebut.

Jumlah terpulihkan adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dengan nilai pakainya. Nilai pakai adalah nilai kini dari arus kas yang diharapkan akan diterima dari aset atau unit penghasil kas. Nilai kini dihitung dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan nilai waktu uang dan risiko spesifik atas aset atau unit yang penurunan nilainya diukur.

Jika, dan hanya jika, jumlah terpulihkan aset lebih kecil dari jumlah tercatatnya, maka jumlah tercatat aset diturunkan menjadi sebesar jumlah terpulihkan. Penurunan tersebut adalah rugi penurunan nilai dan segera diakui dalam laba rugi.

Rugi penurunan nilai yang telah diakui dalam periode sebelumnya untuk aset selain goodwill dibalik jika, dan hanya jika, terdapat perubahan estimasi yang digunakan untuk menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai terakhir diakui. Jika demikian, jumlah tercatat aset dinaikan ke jumlah terpulihkannya. Kenaikan ini merupakan suatu pembalikan rugi penurunan nilai.

After initial recognition, fixed assets, except land, are carried at its cost less any accumulated depreciation, and any accumulated impairment losses.

Depreciation of fixed assets starts when its available for use and its computed by using straight-line method based on the estimated useful lives of assets as follows:

Presentase/Percentage	
5%	Building
20% - 33.33%	Building Renovation and Improvement
12.5% - 25%	Store and Office Equipment
12.5% - 25%	Vehicle

Self-constructed fixed assets are presented as part of the fixed assets under "Asset in Construction" and are stated at its cost. All costs, including borrowing costs, incurred in relation with the construction of these assets are capitalized as part of the cost of assets in construction. Cost of assets in construction shall exclude any internal profits, cost of abnormal amounts of wasted material, labour, or other resources incurred.

The accumulated costs will be transferred to the respective fixed assets items at the time the asset is completed or ready for use and are depreciated since the operation.

The carrying amount of an item of fixed assets is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arrising from derecognition (that determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item) is included in profit or loss when item is derecognized

At the end of each reporting period, the Company made regular review of the useful lives, residual values, depreciation method and residual life based on the technical conditions.

Intangible Assets

Intangible asset is measured on initial recognition at cost. After initial recognition, intangible asset is carried at cost less any accumulated amortization and any accumulated impairment loss.

The useful life of intangible asset is assessed to be eiter finite or indefinite.

Intangible asset with finite useful life

Intangible asset with finite useful life is amortized over the economic useful life by using a straight-line method.

Amortization is calculated so as to write off the cost of the asset, less its estimated residual value, over its useful economic life as follows:

Software: 25 % straight line

The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end.

Intangible asset with indefinite useful life

Intangible asset with indefinite useful life is not amortized. The useful life of an intangible with an indefinite that is not being amortized is reviewed annually to determine whether events and circumstances continue to support an indefinite useful life assessment for that asset. If they do not, the change in the useful life assessment from indefinite to finite is accounted for on a prospective basis.

Intangible asset with indefinite life is tested for impairment annually and whenever there is an indication that the intangible asset may be impaired.

At the end of each reporting period, the Group assess whether there is any indication that an asset may be impaired. If any such indication exists, the Group shall estimate the recoverable amount of the asset. Recoverable amount is determined for an individual asset, if its is not possible, the Group determines the recoverable amount of the asset's cash-generating unit.

The recoverable amount is the higher of fair value less costs to sell and its value in use. Value in use is the present value of the estimated future cash flows of the asset or cash generating unit. Present values are computed using pre-tax discount rates that reflect the time value of money and the risks specific to the asset or unit whose impairment is being measured.

If, and only if, the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset shall be reduced to its recoverable amount. The reduction is an impairment loss and is recognized immediately in profit or loss.

An impairment loss recognized in prior period for an asset other than goodwill is reversed if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If this is the case, the carrying amount of the asset shall be increased to its recoverable amount. That increase is a reversal of an impairment loss.

2.p. Pajak Penghasilan

Beban pajak adalah jumlah gabungan pajak kini dan pajak tangguhan yang diperhitungkan dalam menentukan laba rugi pada suatu periode. Pajak kini dan pajak tangguhan diakui dalam laba rugi, kecuali pajak penghasilan yang timbul dari transaksi atau peristiwa yang diakui dalam penghasilan komprehensif lain atau secara langsung di ekuitas. Dalam hal ini, pajak tersebut masing-masing diakui dalam penghasilan komprehensif lain atau ekuitas.

Jumlah pajak kini untuk periode berjalan dan periode sebelumnya yang belum dibayar diakui sebagai liabilitas. Jika jumlah pajak yang telah dibayar untuk periode berjalan dan periode-periode sebelumnya melebihi jumlah pajak yang terutang untuk periode tersebut, maka kelebihannya diakui sebagai aset. Liabilitas (aset) pajak kini untuk periode berjalan dan periode sebelumnya diukur sebesar jumlah yang diperkirakan akan dibayar kepada (direstitusi dari) otoritas perpajakan, yang dihitung menggunakan tarif pajak (dan undang-undang pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir periode pelaporan.

Manfaat terkait dengan rugi pajak yang dapat ditarik untuk memulihkan pajak kini dari periode sebelumnya diakui sebagai aset. Aset pajak tangguhan diakui untuk akumulasi rugi pajak belum dikompensasi dan kredit pajak belum dimanfaatkan sepanjang kemungkinan besar laba kena pajak masa depan akan tersedia untuk dimanfaatkan dengan rugi pajak belum dikompensasi dan kredit pajak belum dimanfaatkan.

Seluruh perbedaan temporer kena pajak diakui sebagai liabilitas pajak tangguhan, kecuali perbedaan temporer kena pajak yang berasal dari:

- a. pengakuan awal goodwill; atau
- pengakuan awal aset atau liabilitas dari transaksi yang bukan kombinasi bisnis dan pada saat transaksi tidak mempengaruhi laba akuntansi atau laba kena pajak (rugi pajak).

Aset pajak tangguhan diakui untuk seluruh perbedaan temporer dapat dikurangkan sepanjang kemungkinan besar laba kena pajak akan tersedia sehingga perbedaan temporer dapat dimanfaatkan untuk mengurangi laba dimaksud, kecuali jika aset pajak tangguhan timbul dari pengakuan awal aset atau pengakuan awal liabilitas dalam transaksi yang bukan kombinasi bisnis dan pada saat transaksi tidak mempengaruhi laba akuntansi atau laba kena pajak (rugi pajak).

Aset dan liabilitas pajak tangguhan diukur dengan menggunakan tarif pajak yang diharapkan berlaku ketika aset dipulihkan atau liabilitas diselesaikan, berdasarkan tarif pajak (dan peraturan pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir periode pelaporan. Pengukuran aset dan liabilitas pajak tangguhan mencerminkan konsekuensi pajak yang sesuai dengan cara Grup memperkirakan, pada akhir periode pelaporan, untuk memulihkan atau menyelesaikan jumlah tercatat aset dan liabilitasnya.

Jumlah tercatat aset pajak tangguhan ditelaah ulang pada akhir periode pelaporan. Grup mengurangi jumlah tercatat aset pajak tangguhan jika kemungkinan besar laba kena pajak tidak lagi tersedia dalam jumlah yang memadai untuk mengkompensasikan sebagian atau seluruh aset pajak tangguhan tersebut. Setiap pengurangan tersebut dilakukan pembalikan atas aset pajak tangguhan hingga kemungkinan besar laba kena pajak yang tersedia jumlahnya memadai.

Grup melakukan saling hapus aset pajak tangguhan dan liabilitas pajak tangguhan jika dan hanya jika:

- a. Grup memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus aset pajak kini terhadap liabilitas pajak kini; dan
 b. aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan
- b. aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan yang sama atas:
 - i. entitas kena pajak yang sama; atau
 - ii. entitas kena pajak yang berbeda yang bermaksud untuk memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan dimana jumlah signifikan atas aset atau liabilitas pajak tangguhan diperkirakan untuk diselesaikan atau dipulihkan.

Grup melakukan saling hapus atas aset pajak kini dan liabilitas pajak kini jika dan hanya jika, Grup:

- memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus atas jumlah yang diakui; dan
- b. bermaksud untuk menyelesaikan dengan dasar neto atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan.

2.q. Imbalan Kerja

Imbalan Kerja Jangka Pendek

Imbalan kerja jangka pendek diakui ketika pekerja telah memberikan jasanya dalam suatu periode akuntansi, sebesar jumlah tidak terdiskonto dari imbalan kerja jangka pendek yang diharapkan akan dibayar sebagai imbalan atas jasa tersebut.

Imbalan kerja jangka pendek mencakup antara lain upah, gaji, bonus dan insentif.

Imbalan Pascakerja

Imbalan pascakerja seperti pensiun, uang pisah dan uang penghargaan masa kerja dihitung berdasarkan Undang-Undang Ketenagakerjaan No.13/2003 ("UU 13/2003").

Grup mengakui jumlah liabilitas imbalan pasti neto sebesar nilai kini kewajiban imbalan pasti pada akhir periode pelaporan dikurangi nilai wajar aset program yang dihitung oleh aktuaris independen dengan menggunakan metode *Projected Unit Credit*. Nilai kini kewajiban imbalan imbalan pasti ditentukan dengan mendiskontokan imbalan tersebut.

Grup mencatat tidak hanya kewajiban hukum berdasarkan persyaratan formal program imbalan pasti, tetapi juga kewajiban konstruktif yang timbul dari praktif informal entitas.

2.p. Income Tax

Tax expense is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax. Current tax and deferred tax is recognized in profit or loss, except for income tax arising from transactions or events that are recognized in other comprehensive income or directly in equity. In this case, the tax is recognized in other comprehensive income or equity, respectively.

Current tax for current and prior periods shall, to the extent unpaid, be recognized as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess shall be recognized as an asset. Current tax liabilities (assets) for the current and prior periods shall be measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax benefits relating to tax loss that can be carried back to recover current tax of a previous periods is recognized as an asset. Deferred tax asset is recognized for the carryforward of unused tax losses and unused tax credit to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilized.

A deferred tax liability shall be recognized for all taxable temporary differences, except to the extent that the deferred tax liability arises from:

- a. the initial recognition of goodwill; or
- the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset shall be recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised, unless the deferred tax asset arises from the initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction affects neither accounting profit nor taxable profit (tax loss).

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and deferred tax assets shall reflect the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

The carrying amount of a deferred tax asset reviewed at the end of each reporting period. The Group shall reduce the carrying amount of a deferred tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilised. Any such reduction shall be reversed to the extent that it becomes probable that sufficient taxable profit will be available.

The Group offset deferred tax assets and deferred tax liabilities if, and only if:

- The Group has a legally enforceable right to set off current tax assets against current tax liabilities; and
- The deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
 - i. the same taxable entity; or
 - ii. different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

The Group offset current tax assets and current tax liabilities if, and only if, the Group:

- . has legally enforceable right to set off the recognized amounts; and
- intends either to settle on a net basis, or to realize the assets and settle liabilities simultaneously.

2.q. Employee Benefit

Short-term Employee Benefits

Shor-term employee benefits are recognized when an employee has rendered service during accounting period, at the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service.

Short term employee benefits include such as wages, salaries, bonus and incentive.

Post-employment Benefits

Post-employment benefits such as retirement, severance and service payments are calculated based on Labor Law No. 13/2003 ("Law 13/2003").

The Group recognizes the amount of the net defined benefit liability at the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets which calculated by independent actuaries using the Projected Unit Credit method. Present value benefit obligation determine by discounting the benefit.

The Group account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices.

Biaya jasa kini, biaya jasa lalu dan keuntungan atau kerugian atas penyelesaian, serta bunga neto atas liabilitas (aset) imbalan pasti neto diakui dalam laba rugi.

Pengukuran kembali atas liabilitas (aset) imbalan pasti neto yang terdiri dari keuntungan dan kerugian aktuarial, imbal hasil atas aset program dan setiap perubahan dampak batas atas aset diakui sebagai penghasilan komprehensif lain.

Pengakuan Pendapatan dan Beban

Pendapatan diakui bila besar kemungkinan manfaat ekonomi akan diperoleh oleh Grup dan jumlahnya dapat diukur secara handal. Pendapatan diukur pada nilai wajar pembayaran yang diterima, tidak termasuk diskon, rabat dan Pajak Pertambahan Nilai (PPN).

Beban diakui pada saat terjadinya dengan dasar akrual.

Dalam menentukan pengakuan pendapatan, Grup melakukan analisa transaksi melalui lima langkah analisa berikut:

- Mengindentifikasi kontrak dengan pelanggan, dengan kriteria sebagai berikut:
 - Kontrak telah disetujui oleh pihak-pihak terkait dalam kontrak
 - Grup bisa mengidentifikasi hak dari pihak-pihak terkait dan jangka waktu pembayaran dari barang atau jasa yang akan dialihkan
 - Kontrak memiliki substansi komersial
- Mengidentifikasi kewajiban pelaksanaan dalam kontrak. Kewajiban pelaksanaan merupakan janji-janji dalam kontrak untuk menyerahkan barang atau jasa yang memiliki karakteristik berbeda ke pelanggan.
- Menentukan harga transaksi, setelah dikurangi diskon, retur, insentif penjualan, pajak penjualan barang mewah, pajak pertambahan nilai dan pungutan ekspor, yang berhak diperoleh suatu entitas sebagai kompensasi atas diserahkannya barang atau jasa yang dijanjikan ke pelanggan.
- Mengalokasi harga transaksi ke setiap kewajiban pelaksanaan dengan menggunakan dasar harga jual dari setiap barang atau jasa berbeda yang dijanjikan di kontrak.
- Mengakui pendapatan ketika kewajiban pelaksanaan telah dipenuhi (sepanjang waktu atau pada suatu waktu tertentu).

Kewajiban pelaksanaan dapat dipenuhi dengan cara sebagai berikut

- Suatu waktu tertentu (umumnya janji untuk menyerahkan barang ke pelanggan); atau
- Sepanjang waktu (umumnya janji untuk menyerahkan jasa ke pelanggan). Untuk kewajiban pelaksanaan yang dipenuhi sepanjang waktu, Grup memilih ukuran penyelesaian yang sesuai untuk penentuan jumlah pendapatan yang harus diakui karena

Suatu kewajiban pelaksanaan dipenuhi pada suatu waktu tertentu kecuali jika memenuhi salah satu kriteria berikut, dalam hal ini dipenuhi dari sepanjang waktu:

- Pelanggan secara bersamaan menerima dan menggunakan manfaat yang diberikan oleh pelaksanaan Grup sebagaimana yang dilakukan Grup;
- Pelaksanaan Grup menciptakan atau meningkatkan aset yang dikendalikan pelanggan saat aset itu dibuat atau ditingkatkan; dan
- Pelaksanaan Grup tidak menciptakan aset dengan penggunaan alternatif untuk Grup dan Grup memiliki hak yang dapat diberlakukan atas pembayaran untuk pelaksanaan yang diselesaikan hingga saat ini.

Pendapatan dari penjualan barang diakui pada saat pengendalian atas barang telah berpindah kepada pelanggan. Pendapatan jasa diakui pada saat pelanggan menerima dan mengonsumsi manfaat dari jasa tersebut

Beban diakui pada saat terjadinya dengan dasar akrual.

Pada tanggal insepsi kontrak, Grup menilai apakah kontrak merupakan, atau mengandung sewa. Suatu kontrak merupakan atau mengandung sewa jika kontrak tersebut memberikan hak untuk mengendalikan penggunaan aset identifikasian selama suatu jangka waktu untuk dipertukarkan dengan imbalan.

Untuk menilai apakah kontrak memberikan hak untuk mengendalikan penggunaan aset identifikasian selama suatu jangka waktu, Grup menilai apakah selama periode penggunaan, Grup memiliki dua hal berikut:

- Hak untuk mendapatkan secara substansial seluruh manfaat ekonomi dari penggunaan aset identifikasian: dan
- Hak untuk mengarahkan penggunaan aset identifikasian, yaitu hanya jika:
 - Grup memilki hak untuk mengarahkan bagaimana dan untuk tujuan apa aset digunakan selama period penggunaan; atau
 - keputusan yang relevan tentang bagaimana dan untuk tujuan apa aset digunakan telah ditentukan sebelumnya dan:

Grup memiliki hak mengoperasikan aset (atau mengarahkan pihak lain untuk mengoperasikan aset dengan cara yang telah ditentukan) selama periode penggunaan, tanpa pemasok memiliki hak untuk mengubah instruksi operasi tersebut; atau

Grup mendesain aset (atau aspek tertentu dari aset) dengan cara menetapkan sebelumnya bagaimana dan untuk tujuan apa aset akan digunakan selama periode penggunaan.

Grup sebagai Lessee

Grup menerapkan satu pendekatan pengakuan dan pengukuran bagi seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak guna yang merupakan hak untuk menggunakan aset pendasar.

Grup mengakui aset hak guna pada tanggal dimulainya sewa (yaitu tanggal aset tersedia untuk digunakan). Aset hak guna diukur pada harga perolehan, dikurangi akumulasi penyusutan dan penurunan nilai, dan disesuaikan untuk setiap pengukuran kembali liabilitas sewa. Biaya perolehan aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung yang timbul di awal, dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai dikurangi setiap insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama periode yang lebih pendek antara sewa dan estimasi masa manfaat aset

Current service cost, past service cost and gain or loss on settlement, and net interets on the net defined benefit liability (asset) are recognized in profit and loss.

The remeasurement of the net defined benefit liability (assets) comprises actuarial gains and losses,the return on plan assets, and any change in effect of the asset ceiling are recognized in other comprehensive income.

2.r. Revenue and Expenses Recognition

Revenue is recognized when it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and Value Added Tax (VAT).

Expenses are recognized as incurred on anaccruals basis.

In determining revenue recognition, the Group perform analysis transaction through the following five steps of

- Identify contracts with customers, with certaincriteria as follows:
 - The contract has been agreed by theparties involved in the contract
 - The Group can identify the rights of relevant parties and the term of payment for the goods or services to be transferred
 - The contract has commercial substance
- Identify the performance obligations in the contract. Performance obligations are promises in a contract to transfer to a customer goods or services that are distinct.
- Determine the transaction price, net of discounts, returns, sales incentives, luxury sales tax, value added tax and export duty, which an entity expects to be entitled in exchange for transferring promised goods or services to a customer.
- d Allocate the transaction price to each performance obligation on the basis of the selling prices of each distinct goods or services promised in the contract.
- Recognise revenue when performance obligation is satisfied (over time or at a point in time).

A performance obligation may be satisfied at the following:

- A point in time (typically for promises to transfer goods to a customer); or
- Over time (typically for promises to transfer services to a customer). For a performance obligation satisfied over time, the Group selects an appropriate measure of progress to determine the amount of revenue that should be recognized as the performance obligation is satisfied.

A performance obligation is satisfied at a point in time unless it meets one of the following criteria, in which case it is satisfied over time:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as Group performs;
- The Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; and
- The Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Revenue from the sale of goods is recognised when the control of goods has been transferred to the customer. Revenue from the rendering of services is recognized when the customer has received and consumed benefit from the services.

Expenses are recognized as incurred on an accruals basis.

At inception of a contract, the Grup shall assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if he contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Group shall assess whether, throughout the period of use, the Group has both of the following:

- The right to obtain substantially all of the economic benefits from use of theidentified asset; and
- The right to direct the use of the identified asset, only if either:
 - The Group has the right to direct how and for what purpose the asset is used throughout the period of use: or
 - the relevant decisions about how and for what purpose the asset is used are predetermined and:

The Group has the right to operate the asset (or to direct others to operate the asset in a manner that it determines) throughout the period of use, without the supplier having the right to change those

The Group designed the asset (or specific aspects of the asset) in a way that predetermines how and for what purpose the asset will be used throughout the period of use.

The Group as Lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right of use assets representing the the right to use the underlying assets.

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date underlying assets is available for use). right-of-use assets are measure at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, intitial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter period of the lease term and the estimated useful lives of the assets.

(Dalam Rupiah Penuh)

Jika kepemilikan aset sewa beralih ke Grup pada akhir masa sewa atau biaya perolehan mencerminkan pelaksanaan opsi beli, penyusutan dihitung dengan menggunakan estimasi masa manfaat aset.

Pada tanggal dimulainya sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini pembayaran sewa yang harus dilakukan selama masa sewa. Pembayaran sewa mencakup pembayaran tetap (termasuk pembayaran tetap secara substansi) dikurangi piutang insentif sewa, pembayaran sewa variabel yang bergantung pada indeks atau tarif, dan jumlah yang diharapkan akan dibayar dibawah jaminan nilai residu. Pembayaran sewa juga mencakup harga pelaksanaan dari opsi beli yang cukup pasti akan dilaksanakan oleh Grup, dan pembayaran denda untuk penghentian sewa, jika masa sewa merefleksikan Grup melaksanakan opsi untuk menghentikan sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau tarif diaku sebagai beban (kecuali terjadi untuk menghasilkan persediaan) pada periode dimana peristiwa atau kondisi yang memicu terjadinya pembayaran.

Dalam menghitung nilai kini pembayaran sewa, Grup menggunakan suku bunga pinjaman inkremental pada tanggal dimulainya sewa karena tingkat bunga implisit dalam sewa tidak dapat segera ditentukan. Setelah tanggal permulaan, jumlah liabilitas sewa ditingkatkan untuk merefleksikan penambahan bunga dan mengurangi pembayaran sewa yang dilakukan. Selain itu, nilai tercatat liabilitas sewa diukur kembali jika ada modifikasi, perubahan masa sewa, perubahan pembayaran sewa (misalnya, perubahan pembayaran masa depan akibat perubahan indeks atau kurs yang digunakan untuk pembayaran sewa) atau perubahan penilaian opsi untuk membeli aset pendasar.

Ketika liabilitas sewa diukur kembali dengan cara ini, penyesuaian terkait dilakukan terhadap jumlah tercatat aset hak guna, atau dicatat dalam laba rugi jika jumlah tercatat aset hak guna telah berkurang menjadi nol.

Grup menerapkan pengecualian pengakuan sewa jangka pendek untuk sewa bangunan (yaitu, sewa yang memiliki jangka waktu sewa 12 bulan atau kurang, dari tanggal permulaan dan tidak mengandung opsi beli). Hal ini juga berlaku untuk pengecualian pengakuan sewa aset bernilai rendah untuk sewa bangunan yang dianggap bernilai rendah. Pembayaran sewa untuk sewa jangka pendek dan sewa dari aset bernilai rendah diakui sebagai beban dengan metode garis lurus selama masa sewa.

Grup mencatat modifikasi sewa sebagai sewa terpisah jika:

- a Mengurangi jumlah tercatat untuk Modifikasi meningkatkan ruang lingkup sewa dengan menambahkan hak untuk menggunakan satu aset pendasar atau lebih; dan
- b Imbalan sewa meningkat sebesar jumlah yang setara dengan harga tersendiri untuk peningkatan dalam ruang lingkup dan penyesuaian yang tepat pada harga tersendiri tersebut untuk merefleksikan kondisi kontrak tertentu.

Untuk modifikasi sewa yang tidak dicatat sebagai sewa terpisah, pada tanggal efektif modifikasi sewa, Grup:

- a Mengukur kembali dan mengalokasikan imbalan kontrak modifikasian;
- b Menentukan masa sewa dari sewa modifikasian:
- c Mengukur kembali liabilitas sewa dengan mendiskontokan pembayaran sewa revisian menggunakan tingkat diskonto revisian berdasarkan sisa umur sewa dan sisa pembayaran sewa dengan melakukan penyesuaian terhadap aset hak guna. Tingkat diskonto revisian ditentukan sebagai suku bunga pinjaman inkremental Grup pada tanggal efektif modifikasi:
- d Menurunkan jumlah tercatat aset hak guna untuk merefleksikan penghentian sebagian atau sepenuhnya sewa untuk modifikasi sewa yang menurunkan ruang lingkup sewa. Grup mengakui dalam laba rugi setiap laba rugi yang terkait dengan penghentian sebagian atau sepenuhnya sewa tersebut; dan
- e Membuat penyesuaian terkait dengan aset hak guna untuk seluruh modifikasi sewa lainnya.

Grup Sebagai Lessor

Grup mengakui aset untuk sewa operasi di laporan posisi keuangan sesuai sifat aset tersebut. Biaya langsung awal sehubungan proses negosiasi sewa operasi ditambahkan ke jumlah tercatat dari asset sewaan dan diakui sebagai beban selama masa sewa dengan dasar yang sama dengan pendapatan sewa operasi. Sewa kontinjen, apabila ada, diakui sebagai pendapatan pada periode terjadinya. Pendapatan sewa operasi diakui sebagai pendapatan atas dasar garis lurus selama masa sewa.

2.t. Laba per Saham

Laba per saham dasar dihitung dengan membagi laba atau rugi yang dapat diatribusikan kepada pemegang saham biasa entitas induk dengan jumlah rata-rata tertimbang saham biasa yang beredar dalam suatu periode.

Untuk tujuan penghitungan laba per saham dilusian, Grup menyesuaikan laba atau rugi yang dapat diatribusikan kepada pemegang saham biasa entitas induk dan jumlah rata-rata tertimbang saham yang beredar, atas dampak dari seluruh instrument berpotensi saham biasa yang bersifat dilutif.

2.u. Segmen Operasi

Grup menyajikan segmen operasi berdasarkan informasi keuangan yang digunakan oleh pengambil keputusan operasional dalam menilai kinerja segmen dan menentukan alokasi sumber daya yang dimilikinya. Segmetasi berdasarkan aktivitas dari setiap kegiatan operasi entitas legal di dalam Grup.

Segmen operasi adalah suatu komponen dari entitas:

- yang terlihat dalam aktivitas bisnis yang memperoleh pendapatan dan menimbulkan beban (termasuk pendapatan dan beban yang terkait dengan transaksi dengan komponen lain dari entitas yang sama);
- hasil operasinya dikaji ulang secara berkala oleh kepala operasional untuk pembuatan keputusan tentang sumber daya yang dialokasikan pada segmen tersebut dan menilai kinerianya: dan
- tersedia informasi keuangan yang dapat dipisahkan.

If ownership of the leased assets transfers to the Group at the end of the lease term or the cost reflects to exercise of a purchase option, depreciation is calculated using the estimated useful life of the assets.

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expexted to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the assessment of an option to purchase the underlying asset.

When the lease liabilities is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use assets, or is recorded in profit or loss if the carrying amount of the rights of use assets has been reduced to zero.

The Group applies the short-term lease recognition exemption to its short-term leases of buildings and infrastructures (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-values assets recognition exemption to leases of buildings and infrastructures that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

The Group accounts for a lease modification as a separate lease if both:

- a The modification increases the scope of the lease by adding the right to use one or more underlying assets; and
- The consideration for the lease increases by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the particular contract.

For a lease modification that is not accounted for as a separate lease, at the effective date of the lease modification, the Group:

- a Remeasure and allocate the consideration in the modified contract;
- Determine the lease term of the modified lease;
- Remeasure the lease liability by discounting the revised lease payments using a revised discount rate on the basis of the remaining lease term and the remaining lease payment with a corresponding adjustment to the right of use assets. The revised discount rate is determined as Group's incremental borrowing rate at the effective date of the modification;
- d Decrease the carrying amount of the right of- use asset to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease. The Group recognize in profit or loss any gain or loss relating to the partial or full termination of the lease; and
- e Make a corresponding adjustment to the right-of-use asset for all other lease modifications.

The Group as Lesson

The Group presents assets subject to operating leases in the statement of financial position according to the nature of the asset. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as the lease income. Contingent rents, if any, are recognized as income in the period incurred. Lease income from operating leases is recognized as revenue on a straight-line basis over the lease term.

2.t. Earnings per Share

Basic earnings per share is computed by dividing the profit or loss attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the period.

For the purpose of calculationg diluted earnings per share, the Group shall adjust profit or loss attributable to ordinary equity holders of the parent, and the weighted average number of shares outstanding, for the effect of all dilutive potential ordinary shares.

2.u. Operating Segment

The Group presented operating segments based on the financial information used by the chief operating decision maker in assessing the performance of segments and in the allocation of resources. The segments are based on the activities of each of the operating legal entities within the Group.

An operating segment is a component of the entity:

- that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to the transactions with other components of the same entity);
- whose operating results are regularly reviewed by chief operating decision maker to make decisions about resources to be allocated to the segment and assesses its performance; and
- for which separate financial information is available.

Sumber Ketidakpastian Estimasi dan Pertimbangan yang Penting

Penyusunan laporan keuangan konsolidasian Grup mengharuskan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah yang dilaporkan dari pendapatan, beban, aset dan liabilitas, dan pengungkapan atas liabilitas kontinjensi, pada akhir periode pelaporan.

Ketidakpastian mengenai asumsi dan estimasi tersebut dapat mengakibatkan penyesuaian material terhadap nilai tercatat pada aset dan liabilitas dalam periode pelaporan berikutnya.

Estimasi dan Asumsi Akuntansi

Asumsi utama masa depan dan sumber utama estimasi ketidakpastian lain pada tanggal pelaporan yang memiliki risiko signifikan bagi penyesuaian yang material terhadap nilai tercatat aset dan liabilitas untuk periode/tahun berikutnya diungkapkan dibawah ini. Grup mendasarkan asumsi dan estimasi pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun. Asumsi dan situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi di luar kendali Grup. Perubahan tersebut dicerminkan dalam asumsi terkait pada saat terjadinya

Estimasi Umur Manfaat Aset Tetap dan Properti Investasi

Grup melakukan penelahaan berkala atas masa manfaat ekonomis aset tetap berdasarkan faktor-faktor seperti kondisi teknis dan perkembangan teknologi di masa depan. Hasil operasi di masa depan akan dipengaruhi secara material atas perubahan estimasi ini yang diakibatkan oleh perubahan faktor yang telah disebutkan di atas (nilai tercatat aset tetap dan properti asi disajikan dalam Catatan 11 dan 12).

Imbalan Pasca Kerja

Nilai kini liabilitas imbalan pasca tergantung pada beberapa faktor yang ditentukan dengan dasar aktuarial berdasarkan beberapa asumsi. Perubahan asumsi ini akan mempengaruhi jumlah tercatat imbalan pascakerja.

Grup menentukan tingkat diskonto yang sesuai pada akhir periode pelaporan, yakni tingkat suku bunga yang harus digunakan untuk menentukan nilai kini arus kas keluar masa depan estimansian yang diharapkan untuk menyelesaikan liabilitas. Dalam menentukan tingkat suku bunga yang sesuai, Perusahaan mempertimbangkan tingkat suku bunga obligasi pemerintah yang didenominasikan dalam mata uang imbalan akan dibayar dan memiliki jangka waktu yang serupa dengan jangka waktu liabilitas yang terkait.

Asumsi kunci liabilitas imbalan paska kerja sebagian ditentukan berdasarkan kondisi pasar saat ini, informasi tambahan diungkapkan pada Catatan 22.

Rugi Penurunan Nilai Piutang

Pada tanggal pelaporan Grup menilai apakah risiko kredit atas instrumen keuangan telah meningkat secara signifikan sejak pengakuan awal. Ketika melakukan penilaian tersebut, Grup mempertimbangkan perubahan risiko gagal bayar yang terjadi selama umur instrumen keuangan, bukan perubahan atas jumlah kerugian kredit ekspektasian. Dalam melakukan penilaian tersebut, Grup membandingkan risiko gagal bayar pada tanggal pelaporan dengan risiko gagal bayar pada saat pengakuan awal serta mempertimbangkan informasi yang wajar dan terdukung yang tersedian tanpa biaya.

Risiko kredit pada instrumen keuangan dianggap rendah jika instrumen keuangan memiliki risiko gagal bayar yang rendah, peminjam memiliki kapasitas yang kuat untuk memenuhi kewajiban arus kas kontraktualnya dalam jangka waktu dekat dan kondisi ekonomik dan bisnis yang memburuk dalam jangka waktu panjang, namun tidak selalu, menurunkan kemampuan peminiam untuk memenuhi kewajiban arus kas kontraktualnya.

<u>Nilai Wajar Instrumen Keuangan</u> Bila nilai wajar aset keuangan dan liabilitas keuangan yang tercatat pada laporan posisi keuangan tidak tersedia di pasar aktif, ditentukan dengan menggunakan berbagai teknik penilaian termasuk penggunaan model matematika. Masukan (input) untuk model ini berasal dari data pasar yang bisa diamati sepanjang data tersebut tersedia. Bila data pasar yang bisa diamati tersebut tidak tersedia, pertimbangan Manajemen diperlukan untuk menentukan nilai wajar. Pertimbangan tersebut mencakup pertimbangan likuiditas dan masukan model seperti volatilitas untuk transaksi derivatif yang berjangka waktu panjang dan tingkat diskonto, tingkat pelunasan dipercepat, dan asumsi tingkat gagal bayar. Pengungkapan lebih lanjut tentang nilai waiar terdapat dalam Catatan 35

Realisasi dari Aset Pajak Tangguhan

Aset pajak tangguhan diakui atas seluruh rugi fiskal yang belum digunakan sepanjang besar kemungkinannya bahwa penghasilan kena pajak akan tersedia, sehingga rugi fiskal tersebut digunakan. Estimasi oleh manajemen yang disyaratkan untuk menentukan jumlah aset pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat penghasilan kena pajak dan strategi perencanaan pajak masa depan.

Pertimbangan dalam Penentuan Kebijakan Akuntansi

Pertimbangan berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Grup yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian.

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that effect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period.

Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset and liability affected in future periods.

Accounting Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period/year are disclosed below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyong the control of the Group. Such changes are reflected in the assumptions when they occur.

Estimated Useful Lives of Fixed Assets and Investment Properties

The Group reviews periodically the estimated useful lives of fixed assets based on factors such as technical specification and future technological developments. Future results of operations could be materially affected by changes in these estimates brought about by changes in the factors mentioned (carrying amounts of fixed assets and investment properties are disclosed in Note 11 dan 12).

Post Employment Benefits

The present value of the post-employment benefits obligations depends on a number of factors that are determined. Any changes in these assumptions will impact the carrying amount of post-employment benefits obligations.

The Group determines the appropriate discount rate at the end of each reporting period. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the obligations. In determining the appropriate discount rate, the Company considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related obligation.

Other key assumptions for post-employment benefit obligations are based in part on current market conditions. Additional information is disclosed in Notes 22.

Impairment Loss on Receivables

At the reporting date, the Group assesses whether the credit risk on financial instruments has increased significantly since initial recognition. When making this assessment, the Group considers changes in default risk that occurs over the life of the financial instruments, not changes in the amount of expected credit losses. In making this assessment, the Group compares the risk of default at the reporting date with the risk of default at initial recognition and considers reasonable and supportable information that is available free of charge

The credit risk of a financial instrument is considered low if the financial instrument has a low risk of default, the borrower has strong capacity to meet its contractual cash flow obligations in the near term and economic and business conditions deteriorate in the long term, but not always, deteriorate capacity. the borrower to meet its contractual cash flow obligations.

Fair Value of Financial Instruments

Where the fair values of financial assets and financial liabilities recorded on the statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The inputs to these models are derived from observable market data where possible, but where observable market data are not available, judgment is required to establish fair values. The judgments include considerations of liquidity and model inputs such as volatility for long term derivatives and discount rates. prepaymentrates, and default rate assumptions. The other disclosure on fair value is presents in Notes 35.

Deferred tax assets are recognized for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Management estimates are required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Judgments in Applying the Accounting Policies

The following judgments are made by management in the process of applying the Group's accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements.

A defined benefit plan provides the Group's exposure to interest rate risk.

Interest Rate Risk

The present value of the defined benefit pension obligation is calculated using a discount rate determined by referring to yields on high quality corporate bonds. Lower interest rates would increase the liability bond program.

Risk Salaries

The present value of the defined benefit obligation is calculated by referring to the salary of the future program participants. Thus, the salary increase program participants will increase the program's liabilities.

Instrumen Keuangan

Kebijakan Manajemen Risiko
Dalam menjalankan aktivitas operasi, investasi dan pendanaan, Grup menghadapi risiko keuangan yaitu risiko kredit, risiko likuiditas dan risiko pasar dan mendefinisikan risiko-risiko sebagai berikut:

- Risiko kredit: kemungkinan bahwa pelanggan tidak membayar semua atau sebagian piutang atau tidak membayar secara tepat waktu dan akan menyebabkan kerugian Grup.
- Risiko likuiditas: Grup menetapkan risiko likuiditas atas kolektibilitas dari piutang usaha seperti yang dijelaskan di atas, sehingga Grup mengalami kesulitan dalam memenuhi liabilitas yang terkait dengan liabilitas keuangan.
- Risiko pasar: pada saat ini tidak terdapat risiko pasar, selain risiko suku bunga dan risiko nilai tukar karena Grup tidak berinvestasi di instrumen keuangan dalam aktivitas normal.

Dalam rangka untuk mengelola risiko tersebut secara efektif, Direksi telah menyetujui beberapa strategi untuk pengelolaan risiko keuangan, yang sejalan dengan tujuan perusahaan. Pedoman ini menetapkan tujuan dan tindakan yang harus diambil dalam rangka mengelola risiko keuangan yang dihadapi Grup.

Pedoman utama Grup dari kebijakan ini adalah semua kegiatan manajemen risiko keuangan dilakukan dan dipantau di kantor pusat.

Grup tidak memiliki instrumen derivatif untuk mengantisipasi risiko yang terjadi.

Grup mengendalikan eksposur risiko kredit dengan menetapkan kebijakan risiko yang berhubungan dengan bank. Grup menempatkan hanya pada bank-bank dengan predikat baik. Selain itu, kebijakan Grup adalah untuk tidak membatasi penempatan dana hanya di satu bank tertentu, sehingga Grup memiliki kas dan setara kas di berbagai institusi keuangan. Piutang usaha dilakukan dengan pihak ketiga terpercaya dan berelasi.

Kualitas Kredit Aset Keuangan

Grup mengelola risiko kredit yang terkait dengan simpanan di Bank dan piutang dengan memonitor reputasi, peringkat kredit, dan membatasi risiko agregat dari masing-masing pihak dalam kontrak. Untuk bank, hanya pihak-pihak independen dengan predikat baik yang diterima.

Kualitas kredit dari aset keuangan baik yang belum jatuh tempo atau tidak mengalami penurunan nilai dapat dinilai dengan mengacu pada peringkat kredit eksternal (jika tersedia) atau mengacu pada informasi historis mengenai tingkat gagal bayar debitur.

Pada tanggal pelaporan, eksposur maksimum Grup terhadap risiko kredit adalah sebesar nilai tercatat masing-masing kategori aset keuangan yang disajikan pada laporan keuangan konsolidasian.
